

# THE WORLD IS DYING

WORDS & MUSIC BY STEFANIE STEVEN 2017

The world is dying - it's melting the ice  
The world is dying - right in front of your eyes  
Why are we so blind to see and turn away  
The world is dying today

Billions are wasted on weapons and war  
And nobody really knows, what they're fighting for  
Shooting and killing seems to be the game to play  
The world is dying today

*[ original sound from Al Gore speaking (2006) ]*

*"If you look at the 10 hottest years ever measured they've all occurred in the last fourteen years and the hottest of all was 2005 - is it possible that we should prepare against other threats besides terrorists ? Our ability to live is what is at stake !"*

The world is dying - goodbye paradise  
The world is crying - and we cover our eyes  
Oh, why are we so blind to see and turn away  
The world is dying today

*[ original sounds from Al Gore's movie "an inconvenient truth" ]*

Tsunamis and hurricanes are a mother earth sign  
That nature is battling the world's biggest crime  
Plagues and pollution caused by the human disease  
It's no surprise that the world demands peace

We all need to wake up now  
Before it's too late  
And maybe it's possible to escape our fate  
Just start with yourself and learn a new game to play  
let's stop this dying today.
